

Clinical Documentation Integrity (CDI) Education and Query Review Services

With complete and accurate clinical documentation driving quality metrics, accurate reimbursement, and performance-based contracting, getting physicians to improve their documentation is a critical priority. Our peer physicians work directly with your providers, identifying cases and trends where there is opportunity to improve documentation effectiveness and drive immediate revenue results.

Get Credit for The High-Quality Care You Provide

Effective clinical documentation is critical to accurately capture the high quality of care that your hospital provides. When documentation opportunity exists, an organization's fiscal health as well as public perception can be jeopardized due to inappropriate reporting of patient safety events and complications.
